

APPROXIMATE WATER COLOR

Aquaveil™

Pond Colorant

C A R O L I N A M I D N I G H T B L U E

PRODUCT DESCRIPTION

Aquaveil Carolina Midnight Blue Pond Colorant enhances the natural blue color of ponds, lakes and water features. In addition, it acts as a shield from ultra-violet rays by preventing sunlight to penetrate to the pond bottom. Occasionally bodies of water are naturally cloudy-looking for reasons beyond the control of the lake manager. **Aquaveil** will turn a muddy looking pond into a sparkling, deep blue water feature within minutes. Add **Aquaveil** early in the season, before aquatic weeds and algae become established. **Aquaveil** can last up to 6 months depending on rainfall and other weather conditions.

WARNING!

This product will stain: Plants, rocks, stepping stones, sidewalks, pavers and driveways. Areas which may *unintentionally* be colored should be pre-wet and then thoroughly rinsed with water immediately following treatments to prevent staining.

Use of rubber gloves and side-shielded safety glasses is always recommended.

APPLICATION RATES

Apply at the rate of 1 quart of **Aquaveil** per 1 surface-acre of water, 4 to 5 feet deep. If a deeper color is desired, use additional **Aquaveil**. This product should be added to ponds from several different locations to insure even dispersion. Wear rubber gloves when applying **Aquaveil** to protect hands from staining.

NOTICE TO BUYER: This product is intended for professional use. Users must exercise all due caution and judgement when applying the product under their particular usage conditions.

Aquaveil is: • Easy to use • Non-Toxic • Long-lasting
• Harmless to humans and wildlife when used as directed
