

APPLICATION & RATES

Eliminate Existing Foam

Stop tank agitation, and add NoFoam™ across the surface of the foam. When foam starts to drop, restart agitation. Usually 1/2 to 1 ounce of NoFoam™ will be effective per 100 gallons of solution.

Prevent Foam Formation

Add water to tank first, add 1/2 to 1 ounce of NoFoam while agitator is running to ensure even dispersion; then add the other chemicals to tank.

PRECAUTIONS

Keep Out of Reach of Children. If contact with skin occurs, wash with soap and warm water. If contact with eyes occurs, flush with large amounts of water for 15 minutes and seek medical attention. Store in cool, dry location. Keep tightly capped at all times. Avoid freezing. Rinse all equipment immediately; recycle empty containers.

**SHAKE WELL
BEFORE USE**

PRODUCT DESCRIPTION

NoFoam is a highly concentrated, high-strength emulsion solution that kills foam in its tracks, and prevents it from reforming. Agricultural spray tank solutions may contain various hazardous substances that generate foam. If the foam were to overflow onto areas not meant for these chemicals, damage may occur. NoFoam solves the problem by stopping the foam, and preventing it from reforming. The use of NoFoam also speeds tank filling by not having foam to contend with.
